

Still On Magento 1?

SPEAK TO BATHCOMMS

Now's the time to upgrade to Magento 2

Magento 2 builds on the success of Magento 1 but offers a host of important upgrades. There's a greatly refined admin interface that is easier to navigate. The base user speed is much improved, offering far faster interactions for customers with full-page caching built in. Payment processing through well-known gateways such as PayPal and Authorize.net come as standard. And perhaps most important of all, Magento 2 will continue to be supported by Adobe with crucial security updates being released after these are stopped for Magento 1 in June.

Magento Experts

Bathcomms are eCommerce specialists who have been creating Magento solutions for nearly 10 years. Their team of Magento-certified developers ensure that your site is developed and maintained to a high level. If your current solution is not working for you, have a chat with the team to discover how their varied and extensive experience can work for you.

eCommerce Specialists

Bathcomms focus on setting clear goals for your eCommerce website, and then building the site to achieve them. By bringing all their digital communications skills to bear at the specification phase they ensure your website will do what you want it to do: namely, sell. By pairing the appropriate technology to your specification, Bathcomms ensure the platform you end up on is the one that will serve you best, even when that's not Magento.
